

SCHOOL AND DISTRICT EDITION

Administrator Information Packet

A practical planning and program-management platform built for specialty educators.

30+

specialty modules

K-12

planning and teacher tools

1

connected workspace

Created by a 27-year educator

Designed around the real work teachers do before, during, and after instruction.

Why PlansK12

Specialty educators need more than a generic text generator. PlansK12 brings planning, usable resources, progress tools, and program workflows into one teacher-friendly system.

Teacher time matters

Create structured lessons, units, assessments, sub plans, parent communication, and supporting materials without rebuilding every format from scratch.

Specialists deserve purpose-built tools

Each workspace is shaped around its field, from PE participation and CTE employability skills to library programs, art shows, and intervention family nights.

Plans become usable programs

Teachers can run challenges, events, SMART goals, tryouts, grant work, trackers, showcases, and other ongoing responsibilities inside the same platform.

Consistency without rigidity

Clear structures help teachers produce dependable materials while keeping professional judgment, local expectations, and student needs at the center.

ADMINISTRATOR VALUE

One platform supports many hard-to-serve roles

- ✓ Reduce the number of disconnected planning tools educators must learn and manage.
- ✓ Give specialty teachers consistent structures without forcing every subject into one generic template.
- ✓ Support new teachers, experienced teachers, interventionists, therapists, and program leaders.
- ✓ Make lessons, goals, events, and teacher-created resources easier to save, revisit, print, and share.

What educators can do

PlansK12 combines instructional planning with the tools needed to carry a specialty program through the school year.

1 Plan instruction

Lessons, units, pacing guides, curriculum maps, warm-ups, assessments, worksheets, and differentiation.

2 Prepare resources

Print-ready materials plus Word, PowerPoint, visual, and classroom-resource exports where available.

3 Track progress

Class and grade-level SMART goals, participation, run progress, standards, evidence, and reflection.

4 Run school programs

Challenges, family nights, Field Day, STEM Night, art shows, concerts, recitals, productions, and showcases.

5 Support operations

Sub binders, rosters, schedules, classroom-management tools, coaching, tryouts, grants, and career experiences.

6 Keep work together

Module-focused lesson libraries, saved projects, reusable tools, mobile access, and organized specialty workspaces.

Built around teacher choice

Educators select their specialty, grade range, goals, and context. PlansK12 provides a reliable structure; the teacher reviews, adjusts, and owns the final instructional decision.

Who it serves

More than 30 specialty and support roles can work from one account. Every educator receives access to the complete platform, not a restricted subject-only version.

Specialty instruction

- PE & Health
- Art
- Music
- Library & Media
- STEM & Makerspace
- Theater / Drama
- Dance
- World Languages
- Elementary Technology
- After-School Clubs
- JROTC

Career and advanced learning

- CTE pathways
- Gifted & Talented
- Reading Specialists
- Math Specialists
- Test Prep
- Instructional Coaching
- Staff PD & Meeting Planning

Student services and early learning

- Special Education
- Adaptive PE
- ESL / ELL
- School Counselors
- Speech-Language Pathology
- Occupational Therapy
- Physical Therapy
- Teachers of the Visually Impaired
- Teachers of the Deaf & Hard of Hearing
- Student Support Teams
- Early Childhood / Pre-K
- Early Childhood Special Education
- Intervention Planning

Growing with educator feedback

New tools and deeper specialty workflows are added as teachers identify practical needs.

Implementation, privacy, and review

PlansK12 can begin with a focused teacher group and expand after administrators understand fit, usage, and purchasing needs.

A SIMPLE ROLLOUT

1

Discovery

Confirm educator roles, grade levels, goals, purchasing process, and desired timeline.

2

Walkthrough or pilot

Show the relevant specialty workspaces and let a small group test real school tasks.

3

Launch

Create individual educator accounts, provide a short orientation, and identify a school contact.

4

Review

Use teacher feedback and privacy-safe product usage to evaluate adoption and next steps.

CURRENT STUDENT-DATA PRACTICES

- Teacher rosters and saved work are separated by account-level database rules.
- Student-facing pages are excluded from automatic product analytics and session replay.
- Supported AI tools use an alias in place of a known student display-name field.
- Teachers are instructed to use minimal identifiers and keep protected records out of free-text notes.

Schools should complete their own technology, privacy, and purchasing review before entering student information.

Group access and next steps

School and district options are designed to make purchasing straightforward while preserving an individual workspace for every educator.

GROUP ACCESS

Annual options for 5 or more educators

Volume pricing is based on educator count, rollout scope, and support needs. Every licensed educator receives an individual account with access to all specialty modules and teacher tools.

● All modules included

No subject-by-subject add-on fees.

● Individual teacher workspaces

Each educator keeps their own lessons, resources, classes, and tools.

● Flexible starting scope

Begin with a department, one school, multiple schools, or a district pilot.

● Personal support

School inquiries are reviewed directly by Stacey, the educator who created PlansK12.

START THE CONVERSATION

Request a written quote or short walkthrough

Share the roles you want to support, the approximate number of educators, and your preferred timeline. PlansK12 will respond with the most useful next step - information, a demonstration, or a pilot conversation.
